Abstract

The intention of this document is to provide me a template in the future for any and all L^AT_EX projects that I may come decide to embark upon, therefore I shall be including redundant uses of Tex that serve no real purpose aside from reminding me of how to use them when it comes to using them. For example "section 1" is an 'autoref' referring to *page one*.

Contents

1	Section Title	2
1.1	Subection Title	2
1.1.1	Subsubection Title	2

List of Figures

1	Example Figure/Graphic	2
---	----------------------------------	---

List of Tables

1	Table of Examples	2
---	-----------------------------	---

1 Section Title

1.1 Subection Title

1.1.1 Subsubsection Title

1.1.1.1 Paragraph Title

This is an example of a {table} containing \centering and a {tabular}, the table contains example of:

Table 1: Table of Examples

TeX	Formatted
<code>\textbf{Bold text}</code>	Bold text
<code>\textit{italicized text}</code>	<i>italicized text</i>
<code>{\monof command}</code>	command
<code>\textbackslash</code>	\
<code>\tildecentre</code>	~
<code>1st</code>	1 st
<code>Philips\textsubscript{13}</code>	Philips ₁₃
<code>\label{[label]}</code>	[Invisible label of [name]]
<code>\autoref{[sectionOneLabel]}</code>	section 1
<code>\textregistered</code>	®
<code>\textrightarrow</code>	→

et cetera et cetera. Next is a \{figure} which is \caption-ed:
